Utah Based Online Wholesale Lender Network Announces Exclusive Agreement to Provide Lender Network

BUSINESS WIRE

February 16, 1999

Journal Code: WBWE **Language:** English **Record Type:** FULLTEXT

Word Count: 493

ST. GEORGE, Utah--(BUSINESS WIRE)--Feb. 16, 1999--AmeriStar Network Inc. (OTC BB:AMWK), <http://www.ameristarnetwork.com>, and Mortgage Internet Technologies Inc., <http://www.vlender.com>, Tuesday announced that they have signed an exclusive agreement for AmeriStar Network Inc., to provide the Wholesale Lender Network within the Virtual Lender(TM) system, an Internet based mortgage loan origination software.

The agreement follows a 2 year plan for AmeriStar Network to develop a National Internet based distribution channel for mortgage wholesale lending products, a multi-billion dollar industry.

About the Business

To the mortgage professional, the Internet requires a certain level of commitment to Online technology, including site construction, education, administrative, process and a basic understanding of how they will need to react to business procured by the Internet.

The Virtual Lender(TM) was designed to answer these concerns and has proven to be a widely accepted tool for the mortgage professional.

The Virtual Lender(TM) will take the mortgage professional from point "A", being no involvement in the Internet, to point "B", being completely capable of online origination in less than 20 minutes, a process that usually takes 30-60 days and cost several thousands of dollars. The Virtual Lender(TM) is an excellent "Front End" system to host AmeriStar's "AmeriTrac" mortgage loan delivery.

An intricate and very necessary part of this process is the lender interaction with the investor, known within the industry as a "wholesaler". Each day the wholesaler will fax rate sheets to the mortgage broker, these

rate sheets are used to price loan products. The wholesaler competes with other wholesalers for the business of the broker.

The broker commits to a loan product and rate by "Locking" their customer with a specific wholesaler. This creates the commitment of funds by the wholesaler to the broker and the commitment of the broker's customer to use the wholesaler. This process will be done "online" within the Wholesale Lender Center (WLC) by the AmeriTrac System which will save the wholesaler time and money.

The WLC is an area that is built into the Business Development Center (BDC). By entering the BDC, the loan originator may choose the "Wholesale Network" button to access a list of participating wholesale lending institutions, their rate sheets, loan programs and **lock sheets**.

Mortgage Internet Technologies Inc., and AmeriStar plan to officially unveil the AmeriTrac wholesale lender network to the national lending community at the Net 99 National Mortgage Conference (IQPC) to be held in Chicago in June of this year.

Conference Date: 4-8 Aug. 1996 **Conference Location:** Portland, OR, USA

Language: English **Document Type:** Conference Paper (PA)

Treatment: Practical (P)

Abstract: Fannie Mae is a congressionally chartered, shareholder-owned company and the nation's largest source of conventional home mortgage funds. Fannie Mae purchases and securitizes loans and is considered the leader in the secondary mortgage market. Because of its strong leadership role, **Fannie Mae's** policies for loan **eligibility** set the standard in the mortgage industry and applying these policies consistently and effectively is critical to Fannie Mae's mission and profitability. Fannie Mae's policies for selling and servicing mortgage loans span the business functions of the secondary mortgage market and therefore are contained in many different software applications. Managing policy across multiple business applications became increasingly complex. To meet these demands, Fannie Mae developed KARMA (Knowledge Acquisition and Rule Management Assistant) and the Business Rule Server to allow policy changes to be implemented quickly throughout its software application environment and to provide business users with direct ownership and management of Fannie Mae's policies in a way that seamlessly integrates policy into the software applications. KARMA is designed to support the management of these policies independent of the applications in which they are embedded. KARMA generates executable business rules which become part of the Business Rule Server. As a result, policy is managed centrally and no longer embedded in multiple applications. KARMA and the Business Rule Server have been running in production supporting the Cash Delivery application since July, 1995. (6 Refs)

Utah Based Online Wholesale Lender Network Announces Exclusive Agreement to Provide Lender Network

BUSINESS WIRE

February 16, 1999

Journal Code: WBWE **Language:** English **Record Type:** FULLTEXT

Word Count: 493

ST. GEORGE, Utah--(BUSINESS WIRE)--Feb. 16, 1999--AmeriStar Network Inc. (OTC BB:AMWK), <http://www.ameristarnetwork.com>, and Mortgage Internet Technologies Inc., <http://www.vlender.com>, Tuesday announced that they have signed an exclusive agreement for AmeriStar Network Inc., to provide the Wholesale Lender Network within the Virtual Lender(TM) system, an Internet based mortgage loan origination software.

The agreement follows a 2 year plan for AmeriStar Network to develop a National Internet based distribution channel for mortgage wholesale lending products, a multi-billion dollar industry.

About the Business

To the mortgage professional, the Internet requires a certain level of commitment to Online technology, including site construction, education, administrative, process and a basic understanding of how they will need to react to business procured by the Internet.

The Virtual Lender(TM) was designed to answer these concerns and has proven to be a widely accepted tool for the mortgage professional.

The Virtual Lender(TM) will take the mortgage professional from point "A", being no involvement in the Internet, to point "B", being completely capable of online origination in less than 20 minutes, a process that usually takes 30-60 days and cost several thousands of dollars. The Virtual Lender(TM) is an excellent "Front End" system to host AmeriStar's "AmeriTrac" mortgage loan delivery.

An intricate and very necessary part of this process is the lender interaction with the investor, known within the industry as a "wholesaler". Each day the wholesaler will fax rate sheets to the mortgage broker, these rate sheets are used to price loan products. The wholesaler competes with

other wholesalers for the business of the broker.

The broker commits to a loan product and rate by "Locking" their customer with a specific wholesaler. This creates the commitment of funds by the wholesaler to the broker and the commitment of the broker's customer to use the wholesaler. This process will be done "online" within the Wholesale Lender Center (WLC) by the AmeriTrac System which will save the wholesaler time and money.

The WLC is an area that is built into the Business Development Center (BDC). By entering the BDC, the loan originator may choose the "Wholesale Network" button to access a list of participating wholesale lending institutions, their rate sheets, loan programs and **lock sheets**.

Mortgage Internet Technologies Inc., and AmeriStar plan to officially unveil the AmeriTrac wholesale lender network to the national lending community at the Net 99 National Mortgage Conference (IQPC) to be held in Chicago in June of this year.

Fannie Mae Launches Early Rate Lock Program

Text:

...borrowers lock in a stable interest rate during loan underwriting and processing," said Louis Hoyes, **Fannie Mae's** senior vice president for multifamily lending and investment.

Fannie Mae said the new option will further enhance its MBS/DUS program, which enables lenders to **deliver eligible** mortgages to **Fannie Mae** before underwriting and approval have been completed, and receive MBS from the agency in return.

Lenders who are interested in the early rate lock option must follow **Fannie Mae's** recommended best practices trading requirements, which are outlined in the multifamily DUS guide.

Fannie Mae is also mandating that lenders using the new product initially use the agency's customer...

...practices should enable lenders to lessen the risk of failed deliveries and MBS investor disputes, **Fannie Mae** said. - C.O.
